

## Radiology Veterinary Technicians Needed

We are a continuously evolving and expanding practice seeking two full-time radiology technicians. We are looking for hard-working, motivated, enthusiastic, and friendly team-players that can multitask and be flexible. Applicants must have compassion for owners and their pets since we strive as a business to provide excellent customer service.

Pet Specialists of Monterey is an AAHA accredited, 24-hour emergency and specialty animal hospital located on the beautiful Monterey Peninsula. In addition to our emergency and ICU services, our six board-certified specialists offer internal medicine, cardiology, oncology, and surgery services. Please visit our website at [www.thepetspecialists.com](http://www.thepetspecialists.com) to learn more about our state-of-the-art facility.

Job summary: Perform and assist with digital radiology, fluoroscopy, ultrasonography, and CT. Provide in-house staff trainings on safety and positioning.

Responsibilities and qualifications include:

- Position patients for general diagnostic digital radiographic examinations.
- Use physical and or chemical restraints during diagnostic examinations.
- Demonstrate the knowledge and proper use of radiographic equipment in regards to collimation, MA, Time and KVP.
- Knowledge of California Radiation Laws and Guidelines required when using radiation producing equipment.
- Demonstrate proper radiation safety using ALARA, proper shielding with lead attire and monitoring with film badges.
- Produce quality diagnostic images.
- Skills to collaborate with radiologists using correct anatomical, physiological, and radiographic terms when discussing radiographic examinations.
- Experience with digital radiology systems and PACS technologies.
- Knowledge of infectious diseases encountered in veterinary medicine, how to prevent contamination and clean up.

- Experience cleaning and troubleshooting radiographic/ultrasound equipment.
- Knowledge of the anatomy, basic physiology, and basic pharmacology of domestic small animals.
- Experience with computers and information databases, maintaining and effectively organizing records, log books, and files containing confidential data.
- Experience operating eFilm software program.
- Experience with hospital management software, Microsoft Word, Excel, and PowerPoint software.
- Registered Veterinary Technicians are preferred, but we will consider non-RVT candidates with extensive clinical experience.
- Mentorship opportunities for candidates seeking VTS-DI.

Full time benefit packages include medical, dental, vision, 401K, continuing education, uniform allotment, vacation, sick leave, and discounts on pet care.
